PROFESSIONAL SUMMARY

Business-focused **Data & Business Analyst** with proven expertise in translating complex data into strategic business decisions, KPI frameworks, and interactive dashboards. Skilled in **SQL (CTEs, Window Functions, Joins)**, **Python (Pandas, NumPy, Scikit-learn)**, **Power BI (DAX, Power Query)**, **Tableau**, and **Advanced Excel**. Demonstrated track record of identifying growth opportunities and operational efficiencies—including a **+121% conversion lift via A/B testing** and customer churn reduction analytics. Formally trained at **BITSOM** in Business Analytics with Gen & Agentic AI, with strong experience in stakeholder requirement gathering and executive data storytelling.

TECHNICAL SKILLS

Programming & Querying:	Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL (PostgreSQL, MySQL, CTEs, Window Functions, Joins), DuckDB
BI & Visualization:	Power BI (DAX Measures, Data Modeling, Power Query ETL, KPI Dashboards), Tableau (Calculated Fields, LOD Expressions), Advanced Excel (Pivot Tables, XLOOKUP)
Analytics & Methods:	Exploratory Data Analysis (EDA), Hypothesis & A/B Testing, Predictive Modeling (Regression, Classification), Churn Analysis, Cohort Analysis
AI & Emerging Tools:	Generative AI, Agentic AI Workflows, LLM Prompt Engineering, Google Gemini API/SDK, Git/GitHub, RDBMS Schema Design

PROFESSIONAL EXPERIENCE

Data Analytics Intern <i>CETPA Infotech Pvt. Ltd. — Noida, India</i>	07/2025 – 12/2025 <i>On-site</i>
--	-------------------------------------

- Developed an end-to-end **Power BI Sales Performance Dashboard** tracking Total Revenue, Profit Margins, and Regional Performance across multiple product categories.
- Authored **15+ custom DAX measures** (Time Intelligence, YoY growth, running totals) and streamlined Power Query ETL pipelines, reducing report preparation cycle time by **~30%**.
- Authored complex **SQL queries** utilizing multi-table joins, subqueries, and window functions to extract, clean, and validate transactional records from relational database schemas.
- Collaborated with cross-functional team members to translate ambiguous business requirements into dynamic KPI scorecards and actionable executive reports.

Data Analytics Intern <i>Codec Technologies Pvt. Ltd.</i>	09/2025 – 12/2025 <i>Remote</i>
---	------------------------------------

- Conducted rigorous exploratory data analysis (EDA) and data cleansing on telecom customer datasets to uncover primary churn risk indicators across contract type, tenure, and payment methods.
- Trained, benchmarked, and evaluated classification algorithms (Logistic Regression, Random Forest, and Gradient Boosting), selecting **Gradient Boosting** as the top-performing model for customer retention scoring.
- Engineered an interactive **Power BI Churn Risk Dashboard** with dynamic slicing and drill-down metrics, enabling customer retention teams to prioritize high-risk accounts.
- Synthesized analytical insights into data storytelling decks and presented retention recommendations to stakeholders.

KEY ANALYTICS PROJECTS

Retail Sales Analysis, A/B Testing & Predictive Dashboarding

[GitHub Link ↗] · Python, SQL, Power BI, Tableau

- Cleaned and preprocessed **4,200+ transactional records**, analyzing customer purchasing behavior, seasonality, and profit-margin/return-rate fields.
- Designed and executed an end-to-end **A/B test on checkout optimization** (n = 932), achieving a statistically significant **conversion rate lift from 3.19% to 7.04%** (p = 0.0005, **+121% relative increase**).
- Trained a multivariate linear regression model in Python (**R² = 0.84**) to forecast sales volume and quantify the impact of pricing and promotional variables.
- Constructed an interactive **10-view Tableau dashboard** providing stakeholders real-time visibility into regional profit margins, inventory trends, and return rates.

Employee Attrition Prediction & Workforce Analytics

[GitHub Link ↗] · Python, Scikit-learn, Pandas

- Analyzed **1,470 employee records** to uncover primary drivers of turnover, isolating overtime hours and low work-life balance as top indicators.
- Engineered predictive classification models with Scikit-learn, achieving **~87% classification accuracy** with balanced precision and recall metrics.
- Delivered actionable workforce retention recommendations for leadership to proactively mitigate voluntary attrition in high-risk departments.

TechHealth — Multi-Agent AI Analytics & Wellness Assistant

[GitHub Link ↗] · Python, Gemini API, Agentic AI

- Architected a modular multi-agent system coordinating 4 specialized autonomous agents (HealthMonitor, RecommendationEngine, MedicalQA, Coordinator).
- Integrated Google Gemini SDK with persistent multi-turn conversational session memory and context caching for automated health metric synthesis.

EDUCATION

BITSom CEPD (BITS School of Management)	12/2025 – 07/2026
<i>Certification Program in Business Analytics with Gen & Agentic AI</i>	CGPA: 8.03 / 10
R.B.S. Engineering Technical Campus, Bichpuri (A.K.T.U.)	2022 – 2026
<i>Bachelor of Technology (B.Tech) in Electronics & Communication Engineering</i>	CGPA: 7.27 / 10

CERTIFICATIONS & ACCREDITATIONS

- **Oracle Certified:** OCI 2025 Certified AI Foundations Associate
 - **British Airways (Forage):** Data Science & Customer Analytics Simulation
 - **IIT (BHU):** Statistella Data Analytics Competition (B.A.S.H 8.0)
- **Google & Kaggle:** 5-Day AI Agents Intensive Certification
 - **Deloitte & TATA (Forage):** Data Analytics & GenAI Job Simulations
